

# Challenge -1

**The task :**  
**Simple twitter client!**

**TODO:**

1. Layout as shown below, note the layout might be different, but that all must be in a single window. [ No pop ups for each entry ]

- 2. R -> Remember Password and user-name pair.
- 3. Twi button twitts the status, with exception handling.

**Hints :**

- 1. Use GUI helpers like Zenity.
- 2. One can use curl to update status of twitter.  
*`curl -u user:pass -d status="Tweeting from the shell" http://twitter.com/statuses/update.xml`*

**Time Limit : 15 days**

**Wish you good luck!**
